

# GAC Norway Environmental Agency

Unrivalled expertise in environmental services

New regulations offer incentives to comply with rules designed to protect the environment. GAC Norway provides faster, cheaper and cleaner waste handling, environmental operations and NOx emissions reporting services.

Delivering your strategy.

## Our tried and tested consultancy services help you obtain licences to ensure fast, efficient completion of clearance and other formalities.

GAC Norway was formed in May 2007 when the GAC Group acquired an 80% stake in the agency Ole R. Olsen, which had been serving the country's ports and terminals since 1835.

Our environmental agency was created to help you navigate the complex waste management and other environmental rules and regulations applied to the shipping industry. Our support includes:

- Ensure compliance with rules and regulations to avoid the risk of penalties
- Licensed NOx Fund representative and reporting to authorities
- Assistance to obtain financial support for environmental and green technology
- Reduce cost of waste management
- Market specific intelligence
- Nationwide contacts ensuring best possible procedures and cost

### Effective waste management

We specialise in effective solutions for the treatment of industrial waste, liquid fractions

and tank cleaning ships. Our services include waste management, oil spill, pollution response and NOx reporting.

By providing ship-specific solutions for waste handling and disposal, we can reduce the time and money you spend on disposal operations. We provide approved, appropriate packaging and containers, and the relevant fragment-specific labels, ensuring time and cost-savings at the recycling and disposal terminal.

### NOx savings

We'll help you navigate the challenging waters of NOx tax requirements by providing expert assistance for substantial savings. GAC also provides expertise to help members of the Norwegian NOx Fund to claim funding available for their emissions-reducing initiatives.

### Safe and secure

We are committed to ethical and safe business practices and adhere to the GAC Group's stringent Code of Ethics and Healthy, Safety, Security and Environmental (HSSE) policies.
