

GAC UK Drone Services

Safe, reliable, cost-effective drone services for the marine sector

At GAC UK, we are committed to providing reliable, safe, cost-effective drone services with our fleet of state-of-the-art drones specifically designed for maritime applications.

We're fully CAA-approved and every member of our dedicated team of experienced pilots and technicians is GVC-qualified and has what it takes to deliver the single or tailored drone services package you need, when and where you need them.

Delivering your strategy.

Safe asset inspections, fast surveys, remote surveillance

At GAC UK, we take pride in our ability to understand and cater to the unique needs of each customer. With extensive experience and established relationships with local authorities, partners and suppliers, we offer a range of drone services tailored to your requirements.

Unlocking the potential of drones in the marine sector

Drones have revolutionised the way we approach marine operations:

- **Access to hard-to-reach areas:** Our drones safely navigate intricate spaces like ship interiors, piers and offshore platforms.
- **Efficiency in surveys:** We conduct marine asset surveys and inspections swiftly, efficiently and with remarkable ease compared to traditional methods.

- **Cost-effective solutions:** Drone services often prove more cost-effective than alternatives, optimising your budget.
- **Environmental responsibility:** Drones are an environmentally friendly alternative to helicopters and other conventional methods, reducing carbon footprint.

The GAC advantage

- **Experienced and certified team:** Comprised of seasoned drone pilots and technicians with in-depth knowledge of marine sector regulations.
- **Stringent safety measures:** We adhere to strict safety policies, ensuring risk-free operations.
- **Peace of mind:** We're fully insured with a £5 million public liability policy, offering you the confidence and reliability you need.

Let us elevate your operations with innovation, efficiency, and environmental responsibility.
