Re : Increase of Line Handling Service charges for LNG vessels in Pyeongtaek

1. Dear Sir

2. With reference to the above subject we have maintained the rate except MLNG since 1st May 2018 but the increased costs of labour and rising prices in general as well as increases of tariff rates of line handling service have necessitated adjustment to line handling service charges for LNG vessels at Pyeongtaek. (The rates will be the same with those of Kogas Incheon LNG terminal)

(1) KRMI tariff rates : Increased by minimum 15.5% (attached 1&2)

(2) Raising minimum wage : Increased by 35% (attached 3)

3. In view of above we would increase line handling charges as under

(1) Line handling service charges at Pyeongtaek LNG Terminal

US\$ 10,000/call (Under 100,000G/T)

US\$ 11,000/call (Over 100,000G/T - Under 120,000G/T)

US\$ 12,000/call (Over 120,000G/T)

(2) Effective Date : 01st January 2022

Best Regards,

Sang Hwan Lee
